Juke Joint

Juke Joint is a bar cabinet named for the gathering places where Black communities in the American South came together to listen to music, dance, and socialize. A folded aluminum shell surrounds a smaller cabinet made from reclaimed wood. Eight silver patches removed from the outer shell punctuate the door's weathered boards, and a hand-painted interior shows through the narrow gaps between them.

Standard Materials:

Aluminum, Reclaimed Oak & Ash, Acrylic and wood

Standard Dimensions:

19.70"W x 37.90"H x 16.25"D
