

## EARNEST STUDIO

### Mill Table Lamp

Inspired by the dexterity of the basic sphere, Mill is a movable table lamp that maintains its position using balance. Just two components—a ball, balanced on a cone—combined with gravity, afford the lamp an exceptionally wide range of motion. Mill uses energy efficient LEDs and is powered by a low-voltage USB connection. *Custom materials, dimensions and finishes available.*

As Shown: Black powder-coated aluminum, Electrical components
