FOUNDRY Sconce

The textured cast metal of the Foundry Sconce resembles the surface of the moon. The fixture consists of a wide and shallow circular shade that references the shape of a Loon's eye with a gently curved wall with a glass orb at its center. The Foundry Sconce shade is made at a local Catskills forge using the ancient art of sand casting.

As Shown:
Verdigris Manganese Bronze

Standard Materials:
Metal

Bulb Included:
Emery Allen LED G9 4.5W 2700K
dimmable, included 450 lumens

Standard Dimensions:
16.5" dia x 3.5" D

Lead Time:
14 - 16 Weeks
